## Guidelines for showering

---

When taking a shower, make sure the water isn't too hot. As a rule, shower at a maximum of 37 degrees Celsius, that is, your body temperature. You don't need to shower for more than a couple of minutes. Finish by showering in cold water. This closes the pores and prevents the skin from drying out.

1. Begin by wetting the hair and body.
2. Turn off the water, and apply cleanser to the hair and body.
3. Make sure you rinse off thoroughly to remove all shower products.
